
WORK EXPERIENCE

University of Evansville

June 2025 - February 2026

Mobile App Developer

Seattle, WA

- Created FactDrop, an education and communication app, from scratch with a focus on user experience and mobile optimization.
- Built and hosted a secure, failure-resistant backend service to ensure live service for players.
- Published FactDrop to the iOS App Store and Google Play.
- **Skills:** React.js, Ionic Capacitor, Node.js, Devops, Git, HTML, CSS, Claude Code, MySQL, Git

Muddy Robot

January 2025 - June 2025

Gameplay Programmer and Level Designer

Seattle, WA

- Worked to design and build River Wipeout, a mobile endless runner out now on iOS and Android. Performed mobile optimization and accessibility review throughout the procedural levels to improve gameplay.
- **Skills:** Unity Engine, Blender, Perforce, C#

Microsoft

June 2022 - January 2024

Base Kernel Software Engineer I

Redmond, WA

- Built and optimized systems for Windows' App Launch Prefetch to improve performance and launch times across millions of users' devices. Oversaw safe deployment of product features on these millions of devices.
- Made private APIs public and improved both internal and external documentation.
- Created and oversaw tests and performance experiments across millions of Windows Insider enabled machines.
- **Skills:** C, C++, Azure, Kusto Query Language, C#, Powershell scripting, Windows Subsystem for Linux, Git

EDUCATION

Rochester Institute of Technology - Graduated May 2022

Bachelor's of Science, Game Design and Development

Rochester, NY

- **GPA: 3.7/4.0;** *Magna Cum Laude*; Golisano Honors Society; Dean's List.
- Minor in Creative Writing

Extracurriculars

- Chairman of Computer Science House, a dormitory floor dedicated to CS extracurriculars
- Organized the setup and distribution of 1.5 million dollars of server hardware to the university

PROJECTS

SHOE

August 2021 - Current

- SHOE is a custom open-source rendering and game engine built from scratch in C++ with several other contributors over its continuing development.
- Implemented a fully modernized rendering pipeline in DX11 and DX12, allowing techniques from Physically-Based Rendering to GPU Compute particle systems.
- Built a launcher in C# for project management and easy update installation.
- **Skills:** C++, HLSL, C#, Linear Algebra, DirectX 11 and 12, ImGui

Blindsight

January 2026 - Current

- Leading an indie team to create a short horror experience about overstimulation.
- Using instanced static meshes and raycasting to create millions of points of light in a dark level without lag.
- Performing significant level design review to ensure accessibility in a game that starts without light.
- **Skills:** Unreal Engine 5, Blueprint, C++, render pipeline optimization, project management
