WORK EXPERIENCE

Microsoft

June 2022 - January 2024

Base Kernel Software Engineer I

Hybrid - Redmond, WA

- Built and optimized systems for Windows' App Launch Prefetch to improve performance and launch times across millions of users' devices.
- Made private APIs public and improved both internal and external documentation.
- Created and oversaw tests and performance experiments across millions of Windows Insider enabled machines.
 - **Stack:** C; C++; Powershell; WPA/WPR; Kusto Query Language (KQL); WinDBGX

Microsoft

May 2020 - August 2020, May 2021 - August 2021

Azure Software Engineering Intern

Remote - Rochester, NY

- Created kernel-level communication systems for Azure processes to enable eventing across Azure infrastructure.
 - **Stack:** C; C++; Powershell; WinDBGX; Azure

MITRE

May 2019 - August 2019

Innovation Dept. Intern

Boston, MA

- Created various innovations to forward MITRE's future-of-work goals, including implementing a wall-sized video calling service, Natural Language Processing through Snips.AI, projected AR, and quantum programming.
 - **Stack:** Python; FFMPEG; Lightform; Javascript; React; Q#; NGINX; Ubuntu

PROJECTS

SHOE

August 2021 - Current

- SHOE is a custom open-source rendering and game engine, capable of graphical techniques such as Physically-Based Rendering, multitexture blend mapping, refraction, reflection, shadows, and GPU-side particles. It is built from scratch with several other contributors over its continuing development. It comes with a launcher for project management and easy update installation.
 - **Stack:** C; C++; HLSL; C#; DX11; DX12

Minecraft Charity Stream

August 2024 - Current

- Designed, built, and led a team to create a large-scale charity stream where viewers could donate to send items, effects, and mobs onto players. By the end of the 4th year running the stream, we'd raised thousands of dollars for Doctors Without Borders and had streamers participating in the tournament.
 - **Stack:** React; Node.js; Java; Ubuntu; Openshift

coreyrigney.dev

November 2024 - January 2025

- I have too many projects to fit on one resume, so go check out my personal website for more game development and interactive streaming tech!

EDUCATION

Rochester Institute of Technology

August 2018 - May 2022

Bachelor's of Science, Game Design and Development

Rochester, NY

- **GPA: 3.7/4.0; Magna Cum Laude;** Golisano Honors Society; Dean's List
- Minor in Creative Writing
- Chairman of Computer Science House, a dormitory floor dedicated to CS extracurriculars

SKILLS & INTERESTS

- **Skills:** C; C++; HTML/CSS; C#; React; Typescript; Node.js; Git; Python; Linux (Ubuntu); HLSL; Websockets; Unreal Engine 5; Unity; Godot; AWS; Azure; Q#; Source Filmmaker; Creative Writing; GMinig; Improv
- **Interests:** D&D (GMinig and Playing), Reading, Drumming, Video Games (Especially Roguelikes), My Cat
